Monitoring of public opinion about bullying

Nuomonė dėl suaugusiųjų nesikišimo sprendžiant patyčių problemą (%)

Ar pritariate teiginiui, kad patyčios tarp vaikų – tai pačių vaikų reikalas, ir suaugusieji neturėtų į jas kištis?

N=1002

Nuomonei, kad patyčios – tai pačių vaikų rekalas, dažniau <u>nepritaria</u> moterys, žemiausio išsimokslinimo atstovai, mažiausias pajamas (iki 300 Lt) turintys respondentai ir kaimo vietovių gyventojai.

spinter research

In collaboration with public opinion research company "Spinter research" Child line seek to monitor:

- Changes of public attitudes toward bullying;
- Public opinion about effectives ways to deal with bullying;
- Public opinion about the role of adults in dealing with bullying.

Recent fundraising and awareness raising campaign: http://www.patyciumuziejus.lt/en/

A story about bullying reported to the Vaikų Linija is often the first step in stopping bullying – volunteer consultants seek to support and empower the children, and together with them, look for opportunities about how to stop bullying in their environment. Currently, the Vaikų Linija can respond to 1 out of 7 calls from children. With your help, we could respond to more calls and help more children confide about bullying and stop it.

Trainings for school staff, parents, children

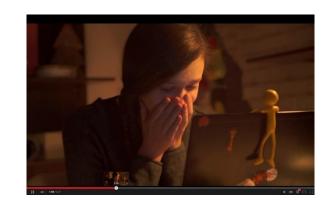

- More than 300 seminars about bullying and its prevention in schools for teachers and other school staff.
- Trainings for teenagers, how to deal with bullying and cyber bullying and how to help other children.

Production and adaptation of various educational films about bullying and its prevention

"Cyber bullying: do you know how to stop it?" (2013)

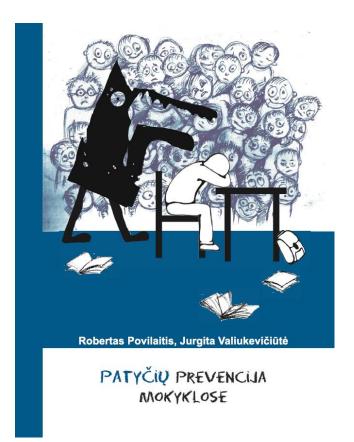

"How to organize the prevention of bullying at school?" (a film of Education Development Centre in partnership with Child Line, 2014)

Leaflets about bullying for children, parents and teachers

- Vaikai gali tyčiotis vieni ik kitų įvairiausiais būdais: prasivardžiuoti, apkalbinėti ir netgi muštis. Jaip pat vaikai gali tyčiotis vieni iš kitų elektroninėje erdvėje, pavyzdžiui, rašyti žeidžiančius komentarus, žinutes ar laišlaus, įkelis socialiniuose etinkluose negražias ir pažaipias nuotrauksa.
- Kartais patyčios gali atrodyti panašios į draugų pajuokavimus, juk tikriausiai ne vienam yra tekę juokais pasakyti draugui. "Na tu ir kvailelist", ar kaip kitaip pašiepti. Vis dėlto labai svarbu, kad žinotum; patyčios nera humoro forma!
- Kai juokaujama, linksma būna abiem žmonėms, o tyčiojantis linksma tik vienam vaikui – kitas tuo metu jaučiasi labai įskaudintas.
